Listed below are dimensions to check when planning a cabinet layout. A sketch is also helpful to have with dimensions showing the location and type of storage cabinets or tool chest needed. Some dimensions listed may not apply to every situation.

| Check | Description  | Dimensions in inches |
|-------|--|----------------------|
|       | Length of garage or shop   |                      |
|       | Width of garage or shop  |                      |
|       | Ceiling height   |                      |
|       | Length of run of storage cabinets and drawer units desired.  |                      |
|       | Access width of door (opening)   |                      |
|       | Access height of door (opening)  |                      |
|       | Window width   |                      |
|       | Distance from floor to bottom of windows   |                      |
|       | Distance from top of windows to ceiling  |                      |
|       | Location and height of garage door rails.  |                      |
|       | Height and width of any foundation ledge.  |                      |
|       | <b>Note the following:</b>   |                      |
|       | Location of windows and doors  |                      |
|       | Make note of any obstructions where cabinets will be installed, such as plumbing, electrical equipment, racks, vents, light fixtures, switches, etc. |                      |
|       | Note amount of clearance space needed around any vehicles.   |                      |
|       | <b>Comments:</b>   |                      |
|       | Aluminum, Stainless Steel or Butcher Block Counter tops available  |                      |
|       | <b>PROII™</b> Cabinet Colors: red, white or black (others on request)  |                      |
|       |  |                      |
|       | "L" shaped cabinet configurations are available  |                      |
|       |  |                      |
|       |  |                      |
|       |  |                      |
